

AGATHA DANTAS

Full-Stack Developer · Software Engineering Student

Salvador, Bahia, Brazil (UTC-3) · +55 71 99271-5037 · workdantas@gmail.com

Portfolio: gatita.dev.br · LinkedIn: linkedin.com/in/agatha-dantas · GitHub: github.com/AgathaDantas

SUMMARY

Full-Stack Developer with hands-on experience building web applications end to end: responsive interfaces with React/Next.js, REST APIs with Node.js/NestJS, and PostgreSQL/MongoDB databases. Built complete management systems, including a multi-tenant ERP in production with HR, Finance, and role-based access control (RBAC) modules. Comfortable with Git/GitHub, Clean Code, Prisma, and automated testing. Strong written English communication; reliable async collaboration.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — CariotecaLabs · Oct 2024 – Present

- Built responsive interfaces with React and Tailwind CSS, improving user experience and cutting average page load time by up to 30%.
- Integrated REST APIs between the website and the mobile app, reducing data synchronization failures.
- Created blog pages, increasing platform flexibility and simplifying content management.
- Refactored reusable components, reducing code duplication and improving maintainability.

IT Apprentice — Sarah Network of Rehabilitation Hospitals · Nov 2023 – Nov 2025

- Provided technical support to staff and patients across internal systems and equipment.
- Performed preventive and corrective maintenance on computers, printers, and self-service kiosks.
- Developed troubleshooting, ticket management, and communication skills with users and the IT team.

PROJECTS

Refakt ERP — Multi-tenant business management system · In production

- Building a full ERP used by a real client: HR (vacations, commissions), Finance (accounts payable/receivable), Suppliers, and management reports.
- Implemented role- and unit-based access control (RBAC), multi-tenant client provisioning, and a staging environment.
- Monorepo architecture: Next.js front end, NestJS API, PostgreSQL with Prisma; linting, type checks, and automated tests in CI.

Stack: TypeScript, Next.js, NestJS, Node.js, PostgreSQL, Prisma, Tailwind CSS · Demo available on request

SIM-UPA — Real-time ER occupancy monitoring · In development

- Real-time monitoring of emergency care units' occupancy and wait times, supporting medical regulation and smart ambulance routing.
- Implemented route calculation with the Google Maps API, critical-occupancy alerts over WebSockets, and dedicated dashboards for managers and rescue teams.

Stack: TypeScript, React, Node.js, PostgreSQL, WebSockets, Google Maps API · Case study: gatita.dev.br/SimUpa

Stox — Real-time inventory management · Completed

- Inventory management system with real-time updates over WebSockets and instant data synchronization.
- Implemented an audit log and strategic dashboards, improving traceability and decision-making.

Stack: TypeScript, React, Node.js, Tailwind CSS, MongoDB · Code (API): github.com/AgathaDantas/Stox-Api

EDUCATION

B.Sc. in Software Engineering — Universidade Católica do Salvador · Aug 2025 – present

Focus on requirements, modeling, software architecture, programming, databases, and scalable systems.

Technical Degree in Systems Development — SENAI Dendezeiros · Jul 2023 – Aug 2025

Programming, databases, APIs, Git/GitHub, and agile methodologies applied to hands-on web development projects.

TECHNICAL SKILLS

Front end: React, Next.js, TypeScript, Tailwind CSS, Framer Motion

Back end: Node.js, NestJS, TypeScript, REST APIs, Java, C#

Databases: PostgreSQL, MongoDB, MySQL, Prisma (ORM)

Tools: Git, GitHub, Docker, Vercel, Figma, CI/CD

LANGUAGES

Portuguese: native

English: B1 intermediate — fluent technical reading and writing
